SYNOPSIS

Experienced as Test Engineer with 3.4 years of expertise in functional testing, delivering comprehensive test coverage for web applications. Adept in manual and automated testing with a focus on test case writing, execution and defect management. Experienced in Agile environments, ensuring high-quality software releases across various domains including E-Commerce and Education domain. I look forward to the opportunities where I can use my testing skills in combination with technical expertise to improve all phases of enterprise.

PROJECTS EXPERIENCE

Dec - 2022 to Present 'Catch' Australia (Domain - E-Commerce)

Designation - Quality Engineer

Project Description -

Contributed to the Product Management Module of an e-commerce platform Catch, focusing on ensuring the seamless onboarding of products, inventory tracking, pricing and discount management. Developed and executed detailed test cases to validate core functionalities like product uploads, stock level updates and price modifications, ensuring the module met business requirements.

Roles and Responsibilities

- Designed and executed test cases for product onboarding, inventory management, pricing and discount features in the Product Management Module.
- Implemented Page Objects model (pom), Apache POI in WebDriver Scripts, Data Driven, using Selenium WebDriver and Java.
- Performed backend validation using SQL to ensure data integrity across product listings, inventory levels and pricing updates.
- Integrated automated tests into Jenkins for continuous integration, enabling real-time feedback on the quality of code changes.
- Managed defect tracking and reporting using Jira, ensuring timely resolution and effective collaboration with developers.
- Collaborated with cross-functional teams to understand requirements, ensuring seamless feature integration and smooth delivery.
- Conducted regression testing and maintained Requirement Traceability Matrix (RTM) to ensure complete test coverage and alignment with business objectives.
