📍 Ahmedabad

QA Engineer with 2.3 years of experience in web testing. Expertise in Manual And Automation Testing, creating and executing detailed test plans and test cases, performing functional, regression, and integration testing. Adept at identifying, documenting, and tracking defects, and collaborating with development teams to ensure quality software delivery. Proficient in utilizing various testing tools and methodologies to enhance testing efficiency and accuracy. Dedicated to maintaining high standards of software quality and improving user experience.

Experience

QA Engineer ,Intellisense Software Private Limited .

(Oct-2022 to Present)

Project:- Digital Banking ,Piermont Bank,NewYork,USA

Piermont Bank, a New York-based digital commercial bank specializing in financial services for SMEs, startups, and entrepreneurs. Provided expertise in commercial lending, business deposit accounts, and treasury management. Utilized advanced digital platforms to enhance online and mobile banking experiences, delivering personalized customer service and strategic financial advice to support business growth.

Roles & Responsibilities

- Ensure adherence to banking regulations and compliance standards such as PCI DSS and GDPR.
- Conduct meticulous testing of financial transactions to ensure accuracy and reliability.
- Utilize testing tools, automation frameworks, and your proficiency in selenium, Core Java, TestNG, Maven to create efficient and effective test plans and cases.
- Implement security testing methodologies and protocols to safeguard customer data and prevent vulnerabilities.
- Apply analytical thinking and problem-solving skills to identify and resolve issues efficiently.
- Communicate effectively and collaborate with cross-functional teams, adapting to changing project requirements and priorities while staying updated with industry trends and technologies for continuous improvement

QA Engineer ,Intellisense Software Private Limited .

Project:- BFSI ,UK

Pouch is a UK-based startup that simplifies insurance purchasing through a digital platform. Users can compare policies from various providers, focusing on transparent pricing and policy details. They offer home, car, travel, and pet insurance, providing an intuitive online experience for research and purchase. Leveraging technology, Pouch streamlines the process with online quotes, digital policy management, and automated claims. They likely offer customer support and have received funding or formed partnerships to expand

Roles & Responsibilities

- Test Planning: create detailed plans outlining the scope, objectives, and strategies for testing claims processing functionalities to ensure comprehensive coverage and compliance.
- Test Case Design: They design test cases and scenarios to validate claims submission, adjudication, and settlement processes, ensuring accuracy and adherence to business rules.

- **Test Execution:** QA testers execute test cases, verifying the functionality, usability, and performance of claims processing systems, and documenting any deviations or issues.
- **Regression Testing:** They conduct regression testing to ensure existing claims processing functionalities remain stable and unaffected after software updates or changes.
- **Integration Testing:** QA testers work with development teams to validate data exchanges and system interactions between claims processing systems and external components, ensuring smooth integration.
- **Defect Management:** They identify, log, prioritize, and collaborate on resolving defects discovered during testing, ensuring a high-quality end product.

Education

- BE in Electronic & Telecommunication ENGG
- Graduation Date: 2022
- CGPA - 8.39

Skills

- **Test Case and Scenario Design:** Expert in creating detailed test cases and scenarios for comprehensive functionality validation.
- **JIRA:** Proficient in issue tracking, project management, and documenting test activities and defects.
- **Selenium:** Experienced in automated web application testing, writing, and executing UI and functionality test scripts.
- **Maven:** Skilled in project build automation, managing dependencies, and ensuring consistent builds.
- **TestNG:** Proficient in test execution, managing test configurations, and generating detailed reports.
- **Postman:** Experienced in API testing, creating, sending requests, and validating responses for reliability.
- **API Testing:** Knowledgeable in testing RESTful and SOAP APIs for data integrity and performance.
- **Cucumber:** Skilled in BDD testing, creating human-readable test cases for both technical and non-technical stakeholders.
- **Appium:** Proficient in mobile application testing on iOS and Android, automating test scripts for functionality validation.
- **SQL:** Experienced in database testing, writing queries to validate data integrity and accuracy.
- **Git:** Proficient in version control, managing code repositories, and collaborating to ensure code quality.
